## YOUR MISSIONS FOR TODAY

---

You are going to experience the management of a project through a simulation created by Harvard.  
I'm not explaining much about it, I don't want to spoil anything.  
You'll be working in group (project groups).

**SPOILER:** Many elements in this project will spoil the movie Avengers: Age of Ultron.  
**AND,** it is not an option to walk out of the room.

## BUILDING YOUR GANTT CHART

---

By the end of this session, your group is expected to push the first version of your Gantt chart to Git, even if it is not complete.

Put as many elements as possible on it.

Remember that the chart you are expected to have has two main parts:

- \* One for the preparation of the project elements
- \* One for the construction of the suit itself
